

What to do...

1. Look around your home. How many clocks can you count?
2. Include clocks on the TV, the video, the DVD, alarm clocks, people's watches.
3. Draw each clock – showing the time it says!

Count the clocks

This activity will help your child learn how to tell the time using digital and analogue clocks. At this age we focus on 'o'clock' times – 3 o'clock, 12 o'clock, etc. Once children have understood these times, we can move on to half and quarter hours.
