

# What to do...

## Digital numbers!

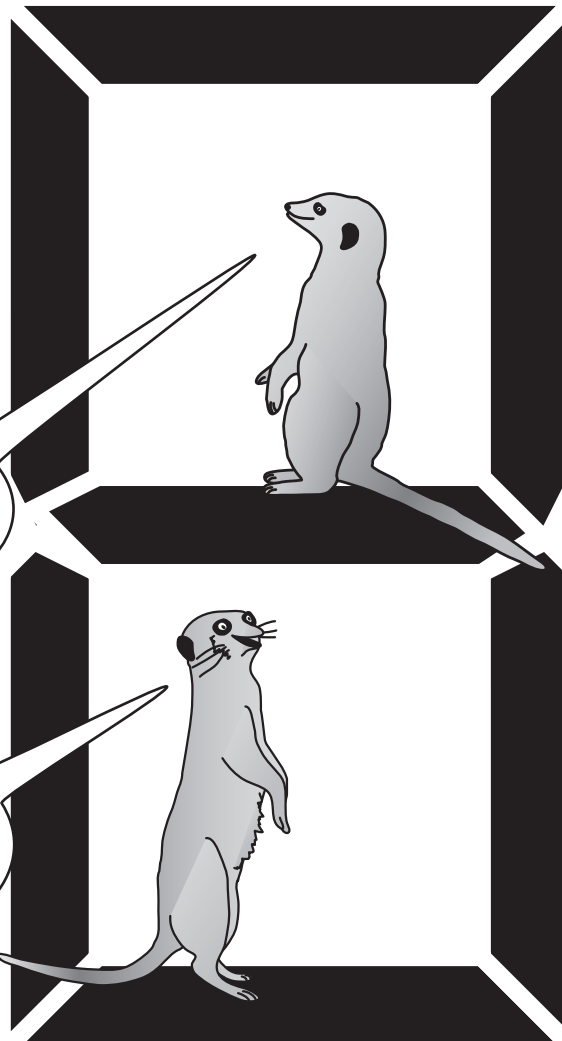

This activity shows children the patterns to be found in drawing digital numbers. Look at digital displays when you are out and about and help children to read the numbers and also to recognise when a display is telling an 'o'clock' time.

© Hamilton Trust, 2008. Y1.

1. On a digital display, the number '5' is made up of five lines:

2. Other numbers are made up of different lines of this grid.
3. Use the grids on the attached sheet to draw different numbers.
4. Which numbers are made up of the same number of lines as their number?
5. Explore the patterns.

I'm really exploring this pattern!

Get down from there. My digital watch says it is time for tea.
