

What to do...

1. Find ways to use coins to buy each egg.
2. You must use different coins to buy each one!
3. BUT you can't use more than 5 of any one coin!
4. Can you find different ways to buy more eggs for 11p?

Eggs eleven

This activity is about investigating the different ways of making 11p. Try to encourage your child to be logical and systematic in their trials – e.g. we can use 10p + 1p, or 5p + 5p + 1p, or 5p + 2p + 2p + 1p...

I have to buy six different Easter eggs for 11p each and I can't use the same coins for each one? That is a tough one! And I don't even like eggs!
