

What to do...

1. Make your own number track of the numbers from 1 – 20 or longer!
2. Use the picture below to help you.
3. Write speech bubbles, draw pictures and decorate the track with things that are special to you and your family.

Make a track...

This activity helps familiarise your child with numbers. They can talk about each number as they add things to the track. When the track is finished and beautiful (!) we shall use them to play counting-on track games in class.
