

Shape pictures

Re-arranging shapes in this way enables children to explore the properties of different shapes. Support your child by helping them to draw round the shapes in different arrangements. It helps to stick the paper shapes on card!

© Hamilton Trust, 2008. Y1.

What to do...

1. Cut out these three shapes.

2. Arrange these three shapes so that they are all touching and draw round them to create an outline.

3. How many different outlines can you create?

4. Colour some by shading with a crayon.
