

# Spiral numbers

This activity helps children to count in tens – and also to write their numbers. Support them by helping them write any numbers they find hard – especially the 'teen' numbers (between 11 and 20).

© Hamilton Trust, 2008. Y1.

## What to do...

1. Continue writing the numbers in the spiral.
2. Colour the numbers ending in '0'.
3. When you have finished colouring – say the coloured numbers in order.

I think I can write the numbers up to 10, but I might need a bit of help after that!
